

1.Functional Requirements

ID	Requirement	Description	Priority
FR-01	Meeting input	System must accept meeting text via paste or .txt file upload	Must Have
FR-02	Action item extraction	NLP engine must identify tasks, owners, and deadlines from text	Must Have
FR-03	Effectiveness scoring	System must generate a 0–100 score with scoring breakdown	Must Have
FR-04	Recurring issue detection	System must compare current meeting with history and flag patterns	Must Have
FR-05	Analytics dashboard	Managers must be able to view team score trends over time	Must Have
FR-06	User authentication	System must support login, registration, and role-based access	Must Have
FR-07	Meeting history	Users must be able to view and search all past meetings	Should Have
FR-08	Export report	Users should be able to export meeting analysis as PDF	Should Have
FR-09	Team comparison view	Admin can compare effectiveness scores across multiple teams	Nice to Have

2.Non-Functional Requirements

ID	Category	Requirement
NFR-01	Performance	NLP analysis must complete within 3 seconds for inputs under 2000 words
NFR-02	Security	All meeting data must be encrypted at rest and in transit (HTTPS / JWT)
NFR-03	Usability	Dashboard must be usable without training; intuitive for non-technical managers
NFR-04	Scalability	System must support up to 500 concurrent users without performance degradation
NFR-05	Availability	System uptime target of 99.5% during business hours
NFR-06	Compatibility	Web application must function correctly on Chrome, Edge, and Firefox
