

1 Stakeholder Register

Stakeholder	Role	Interest / Need	Influence	Engagement
Team Members	End User	Quick action item capture, less manual work	Medium	High
Team Managers	Primary User	Team productivity visibility, trend analytics	High	High
HR Department	Indirect User	Employee performance and engagement data	Medium	Medium
IT / DevOps	Support	System reliability, security, integration	Medium	Low
Senior Leadership	Sponsor	ROI, org-wide efficiency metrics	Very High	Low
Project Manager	Owner	Project delivery, feature completeness	High	Very High

2 Stakeholder Pain Points

Team Members:

- Spend significant time writing and distributing meeting notes after every call
- Action items assigned verbally are easily forgotten with no tracking

Team Managers:

- Cannot objectively measure whether team meetings are productive or wasteful
- No data to compare meeting effectiveness across different sprint teams

Senior Leadership:

- No visibility into whether engineering teams are spending meeting time efficiently
- Cannot identify which departments have the most repeated unresolved blockers
